

Securope lifeline clamped on beams

Ligne de vie Securope bridée sur poutres

Securope Seilsicherungssystem auf Balken festgekontert

Línea de vida Securope anclada a la viga

Code N° IDF055-100 / IDF055-200 / IDF055-300

Description

The fixing assembly IDF055 is counter-plated to rectangular profiles or beams. 3 models have been designed to fit on beam widths from 50 to 300mm.

They are not only compatible with all Securope anchors, but also with our rigid rails (Securail Pro, Safeaccess). If the user has access to the rear of the beam, the IDF055 is ideal as it preserves the integrity of the supporting structure. Available from stock.

Material

Stainless steel 304

KG 6,224 Kg to 13,236 Kg

x 4
