RopeClimber on trípode
RopeClimber auf Dreifuß

Code N° RopeClimber & IDBA2 & SafeAccess Tripod

FALLPROTEC

January 2018

Description

The RopeClimber hoist mounted on a tripod IDBA-2 is the ideal height access system to work in confined space such as a silo. The RopeClimber hoist is permanently fixed on the tripod. Powered by a li-ion battery the end user can ascend and descend with a speed of 8 meter per minute. Lifting capacity 120kg on 500m.

The remote control enables to command the RopeClimber at 100m distance.

The RopeClimber tripod kit is composed of the following safety systems:

- Retrieval fall arrest device with manual pulley to lift person
- Over-load device
- Over-speed device

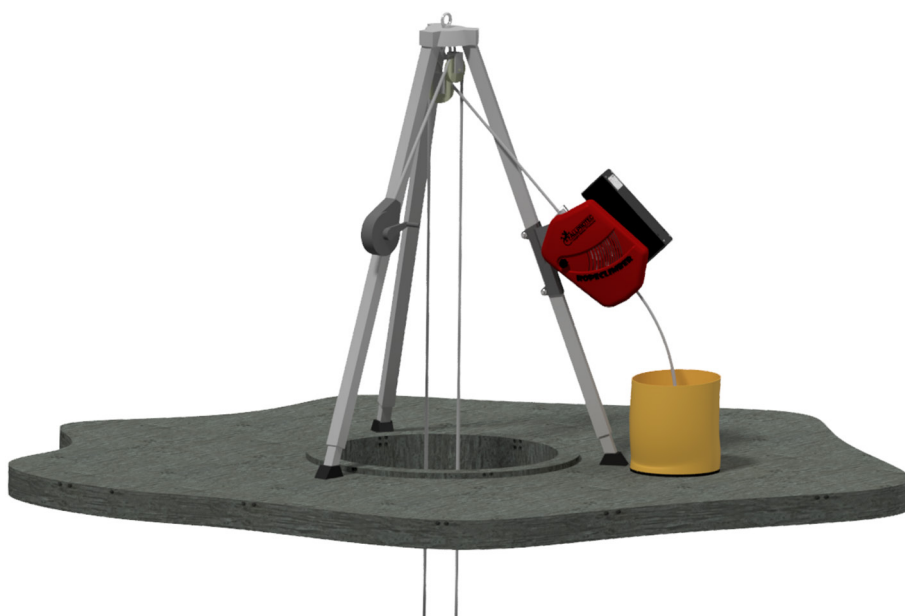

Complies to the machine directive
2006/42/CE
Made in EU

Certificate:
0062/5530/760/02/15/0303

Technical specifications
